

Motor v. Aeroplane.

Eupert Jeffkins, the Australian racing and record - breaking motorist, challenges J. Guillaux, the visiting French aeroplanist, to a match on any racecourse, Jeffkins to drive his racing motor car and Guillaux to pilot his aeroplane. Jeffkins guarantees that his car will attain a speed of 80 miles an hour on the straight of any course a mile or more in circumference, and expresses his confidence that if the challenge is accepted, a thrilling contest will be witnessed. He offers to race for a percentage of the gate receipts.
