

VICTA

AIRTOURER 100

...IMPRESSES THE EXPERTS

Australian designed, Australian built, the Victa Airtourer has already impressed all local and overseas aviation experts who have seen it.

The first Australian light aircraft to be designed, tested and tooled for quantity production, it is ideally suited for personal, commercial and executive use as well as a dual control club trainer.

Powered by the proven 100 H.P. Continental

engine, the Victa has a top speed of 133 m.p.h. and a cruising speed of 126 m.p.h. It can climb at 80 m.p.h. to 15,000 ft. and has a maximum range of 840 miles. Fuel consumption is 4.5 gallons per hour.

The Victa Airtourer has many quality features that make it the most desirable light aircraft available in Australia today. For further details please contact:
