

## **FOLLAND GNAT: THE RIGHT PERFORMANCE— AND TWO FOR THE PRICE OF ONE**

The Folland Gnat advanced trainer at half the price of its contemporaries is the ideal half-way step in performance between the basic trainer of today and the modern supersonic front-line aircraft. It can be fitted with guns, bombs, rockets or cameras for operational training or

combat duties. Powered by a single Bristol Siddeley Orpheus 101 Turbojet the Gnat strikes a perfect balance between performance and economy. It is supersonic in a shallow dive over a wide height band and has outstanding manoeuvrability and rate of climb.
