UP UP UP GOES AIRFREIGHT BUSINESS!

And up goes the revenue of carriers with specialized freight fleets. But this is only part of the story. Efficient air freighting needs a streamlined handling system from factory to customer. With the Argosy freighter, Whitworth Gloster Aircraft offers:

- Truck-bed height freight floor.
- Simultaneous double-end loading and unloading.
- Full-width freight doors.
- Straight-through unobstructed fuselage.
- Prop-jet speed and economy.
- Full pressurization.
- Long fatigue-free life.
- Hawker Siddeley worldwide after-sales service.

Plus complete warehouse mechanization, palletization and ground handling equipment using the well-proved ROLAMAT system. Argosy turnaround—13 tons out and 13 tons in—can take only 12 minutes.
