

## **FOLLAND GNAT: THE RIGHT PERFORMANCE— AND TWO FOR THE PRICE OF ONE**

The Folland Gnat advanced trainer at half the price of its contemporaries is the ideal half-way step in performance between the basic trainer of today and the modern supersonic frontline aircraft. It can be fitted with guns, bombs, rockets or cameras for operational

training or combat duties. Powered by a single Bristol Siddeley Orpheus 101 the Gnat strikes a perfect balance between performance and economy. It is supersonic in a shallow dive over a wide height band and has outstanding manoeuvrability and rate of climb.
