

# THE 1960 DOVE . . . PRODUCT OF MORE THAN 1,400,000 HOURS' FLIGHT EXPERIENCE

**Enthusiastically approved by passengers and pilots, the big, roomy Dove in an 8, 9 or 11 seat configuration is unbeatable for Feeder Line operation.**

The deep, restful armchair luxury of the Executive version has set the standard for those who demand only the best in personal transport.

Right throughout the world, Doves are on active service in a variety of civil and military roles . . . proof indeed of the universal acceptance of this fine aircraft. In Australia, Doves are successfully used for airline and charter operations, executive transport and aerial ambulance work.

Here, now is the 1960 Dove . . . unchanged in basic design concept, but incorporating a host of up-to-the-minute refinements developed over 1,400,000 hours' flight experience. Cruising speed is in excess of 200 m.p.h. Fuel capacity gives up to 1,500 miles range. Two roomy baggage compartments with 89 cubic feet capacity hold 900 pounds of luggage. Custom-designed interiors with a selection of "modern as tomorrow" furnishings and colour schemes are just a few of the highlights.

This Dove, thoroughly flight proven and developed, is backed by the unparalleled engineering know-how and resources of the vast de Havilland Enterprise.
